Subject: Goliad Aquifer Exemption

To All Who Are Concerned (hopefully):

I am writing to inquire as to the reason(s) behind the EPA now not pushing for the appropriate studies in the matter of the uranium mining ruination of our county's life-sustaining water.

It has become my understanding that the modeling of that portion of our aquifer has not been performed, and yet there is discussion of settling

the matter without the important tests.

It was put forth at a recent Goliad County Groundwater District meeting that the EPA had requested UEC, the GCGCD, and the EPA have a telephone conference to see if an agreement could be reached regarding the aquifer exemption.

Huh?

This would be unconscionable.

Please, insist on the two-phased modeling tests/studies.

The EPA's mandate is protection: TCEQ is paid largely via fines and permits, etc. provided by the industries it rubber stamps into destructive environmental roles, thus its protective functions are reduced to that of the Fox Guarding the Hen House, as so to speak.

The EPA is supposed to be in a less precarious position dollar-wise and thus able to protect the people and our precious resources.

I urge the EPA to say No! to backing down.

And, NO!!! to the Goliad Aquifer Exemption entirely.

We all know the issues and problems that come in the wake of the pirate vessel called Uranium Mining. Just look around the rest of Texas that has experienced such, around the USA, or the world for that matter.

Sincerely,

Robin Sherwood

Goliad County, Texas

Nuclear is not the answer to anything, except Greed
and Destruction
